

- Write a technological description of elliptical biface morphology.

\*\* Added in discussion

- Indicate if other synonyms are used in the bibliography to designate elliptical biface morphology.

\*\* These were included as keywords (Galt biface, Nikolas knives, Jowell knives, etc) as a means of ensuring that others working with these bifaces could easily locate this piece

And correct a mistake:

- In the "calcurve\_plot(an21.cal)" graph, change "bc" to "AD" or similar abbreviation.

\*\* I tried to make this change; however, was unable to alter the text on those axes. Thus, I've removed that plot from the supplementary materials—certainly appreciate your bringing this to my attention.

Respectfully submitted,  
Zac SELDEN
